

Niflate⁹⁹

Pure and Simple

APH12 Portable Truck Nitrogen Machine

The Niflate⁹⁹ Model APH12 automatic portable nitrogen machine is designed for fleet maintenance facilities. It replaces air with the purest nitrogen available... faster than any other machine available.

- One machine does it all for commercial vehicles.
- Hands-free operation enables 1 to 4 tires to be *purged and inflated automatically* by the same technician providing other vehicle services.
- It uses 99.9% pure, dry nitrogen, available in single cylinders or pallets of 6 and 12. Each cylinder inflates 10 typical commercial tires with 30 cubic feet of nitrogen for as little as \$1.50 per tire.
- It's very portable and can be moved easily for use between service bays and remote locations. It operates for hours on affordable power packs. (Power packs are not included.)
- It features user-friendly controls. Anyone can set it up easily for any vehicle in 5 seconds.
- You avoid costly and time consuming installation. It's ready to use when shipped.
- It features an additional nitrogen port to easily connect equipment for closed loop AC pressure tests.
- The APH12 Portable Nitrogen Inflator includes:
 - Heavy-duty 4-wheel cart that holds 2 cylinders
 - Automatic hands-free controller equipped with high-pressure 2-stage regulator and fittings to inflate commercial tires.
 - Four 25ft. coiled reinforced polyurethane hoses
 - Miniflator hand inflator on 25ft. coiled hose for easy top-offs
 - Marketing Kit
