Pure and Simple

EZ04 Portable Nitrogen Inflator

Service 1 to 4 tires at once without programming

The NIflate⁹⁹ Model EZ04 Nitrogen Inflator is the only machine that easily replaces air with nitrogen in 1 to 4 tires at once without programming.

- The exclusive ergonomic design of the heavy-duty cart makes it easier to use. In its stationary position the control panel is aligned with the technician's line-of-site for increased visibility. And, when it's moved around the shop, the weight is aligned over the wheels for increased stability.
- The digital hand control makes it easy to inflate tires with nitrogen. No programming is required.
- A single lever activates hands-free deflation of all 4 tires. Again, no programming is required. *It's just that simple!*
- It uses tanks of 99.9% pure, dry nitrogen, available from your local gas distributor.
- It features an additional nitrogen port to easily connect equipment for closed loop AC pressure tests.
- It operates on a replaceable Lithium battery for up to 950 hours under normal working conditions.
- You avoid costly and time consuming installation. It's ready to use when shipped.
- The EZ04 Nitrogen Inflator includes:
 - Ergonomically designed heavy-duty 2-wheel cart
 - Industrial Regulator
 - Four 25ft. straight reinforced polyurethane hoses
 - Miniflator controller designed to inflate typical automobile and light-duty truck tires
 - Marketing Kit

*EZ04 Portable Nitrogen Machine
(Cylinder not included)*
